Step Two
If you haven’t set up an account, click Sign Up and enter your details. After your account is created, sign in using the account credentials you have just entered.

Step Three
Now you have access to the ordering platform. From here, you are able to access the business card templates to create your own based on the template.

Start by clicking the green Create a New Product in the top of the page.
Step Four
Select the Business Card option and the template. This will open the design in full interactive page where you will be able to begin customizing.

Step Five
Once you’re in the individual card view, you are able to add in your own personal information. Click on the detail side of the cards to start adding your own information.
Step Six
Click on the flip card icon to edit the website if you wish to have a Valley-specific website. If you don’t need to make this edit, you may skip past this by clicking the green rectangle button in the top right.

Step Seven
After you have checked your information for any spelling errors, simply click Add to Cart on all of the products you are ordering.
Step Eight
You should see a traditional online checkout page which outlines your order quantity, card options and contact information. Proceed through the checkout prompts and you’re all set!
